EXPERIENCE:

Bank of America *Global Corporate and Investment Banking* **|** **July - October 2023**
Global Capital Markets Analyst - Rates & FX Derivatives

- Analyzed and reported revenue trends across global Rates & FX derivatives desks, informing leadership decisions on product and market prioritization
- Produced FX market updates and client-facing materials on rotating currencies, supporting trading decisions and increasing client engagement
- Conducted KYC/AML checks and credit validation for FX spot and forward trades (35–50K notional), ensuring regulatory compliance and trade execution readiness
- Priced FX forwards and swaps using internal systems and Excel; trained 2 analysts on swap pricing and advanced Excel (pivot tables, modeling)

Bank of America *Global Corporate and Investment Banking* **|** **June - August 2022**
GCIB - Summer Markets Analyst

- Created documents for dissemination to controllers at clients to make them aware of our product and encourage trade activity, and liaised with FX spot trading desk to cover the Yen and the Peso for clients to decide in which direction to trade
- Developed a project on deal-contingent FX forwards to hedge FX risk in the area of Mergers & Acquisitions, and presented it to a team of Analysts, Associates, and Seniors
- Executed a case analysis project where a customized hedging program was created to address cross-border currency risk utilizing vanilla forwards, as well as interest rate risk - by employing IR swaps. Presented project to Senior leadership for review
- Supported a project to price historical cross-currency swaps due to Libor replacement rates, and completed a project to filter prospects, enabling convenient cross-system tracking of large clients with many subsidiaries for swifter client trading services
